Thin Solid Films 335 (1998) 305–310

thin solid films

Subject Index of Volume 335

Al/poly(4,4′-dipentoxy-2,2′bithiophene)/ITO
Effect of white light irradiation on the systems ITO/poly(4,4′-dipentoxy-2,2′bithiophene)/aluminium and ITO/poly(3-butylthiophene)/aluminium, 168
Alloys
Modeling of reactively sputtered TiAlN films, 122
Aluminum
Modeling of reactively sputtered TiAlN films, 122
Aluminium oxide
Antibacterial effects of Ag-HAp thin films on alumina substrates, 214
3-Aminopropyltriethoxysilane (APTES)
Evaluation of amine-functionalized coatings for liquid-phase QCM applications, 237
Amorphous materials
Effects of high-temperature annealing on the structure of reactive sputtering a-SiC:H films, 249
Potential of Sb_2Se_3 films for photo-thermal phase change optical storage, 270
Annealing
Model and computer simulation results of defect transformation and decomposition of SiN_x:H films during high temperature treatment, 19
Effects of high-temperature annealing on the structure of reactive sputtering a-SiC:H films, 249
Atomic layer epitaxy (ALE)
Epitaxial growth of II–VI compound semiconductors by atomic layer epitaxy, 284
Auger electron spectroscopy
Modeling of reactively sputtered TiAlN films, 122

Barrier height
Extraction of interface state density of Pt/p-strained-Si Schottky diode, 142
Biomaterials
Fluence dependence of hydroxyapatite laser ablation plumes, 43
Bis(ethylenedithio)tetrathiafulvalene
Evaporated thin films of tetrathiafulvalene derivatives and their charge-transfer complexes, 209
Boron
Second-oxidation properties of thin polysilicon films grown by LPCVD and heavily in situ boron-doped, 70
Boron carbide
Sputter deposition of high resistivity boron carbide, 174

Cadmium sulphide
Accurate control of thin film CdS growth process by adjusting the chemical bath deposition parameters, 37
Calcium
Antibacterial effects of Ag-HAp thin films on alumina substrates, 214
Carbon
Growth and characterization of diamond-like carbon films by pulsed laser deposition and hydrogen beam treatment, 27
Nanocrystalline gold in Au-doped thin C_{60} films, 258
CeO_2–TiO_2
Preparation of transparent CeO_2–TiO_2 coatings for electrochromic devices, 245
Ceramics
Effect of pyrolysis temperature on the characteristics of PZT films deposited by the sol-gel method, 220
Charge-transfer compound
Evaporated thin films of tetrathiafulvalene derivatives and their charge-transfer complexes, 209
Chemical vapor deposition
Epitaxial growth of 3C-SiC by low-pressure chemical vapor deposition on a surface-structure-controlled molecular beam epitaxy layer, 32
Excitation energy dependence of photoluminescence in nanocrystalline silicon deposited by remote plasma chemical vapor deposition, 266
Chemical–mechanical polishing
Modification of the Preston equation for the chemical–mechanical polishing of copper, 160
Chromium
Formation of Cr&z.sbnd;O and Cr&z.sbnd;N&z.sbnd;O films serving as Cu oxidation resistant layers and their N_2 pre-sintering effect, 146
Coatings
A new formula on the thickness of films deposited by planar and cylindrical magnetron sputtering, 279
Conducting polymers
Effect of white light irradiation on the systems Al/poly(4,4-dipentoxy-2,2′-bithiophene)/ITO and Al/SiO/poly(4,4′-dipentoxy-2,2′-bithiophene)/ITO, 192
Conductivity
A study of electrochemical copolymerization of 3-butylthiophene and 3-bromothiophene, 106
A study of electrochemical copolymerization of 3-butylthiophene and 3-bromothiophene, 112
Pulsed laser deposited crystalline ultrathin indium tin oxide films and their conduction mechanisms, 299
Copper
Characterization of epitaxially grown Cu/Nb multilayer on α-Al_2O_3 with RBS/channeling technique, 85
Ion irradiation effect on single-crystalline Cu/Nb and Nb/Cu/Nb layers on sapphire, 134

0040-6090/98/$ - see front matter © 1998 Elsevier Science S.A. All rights reserved.
PII S0040-6090(98)01493-X

Formation of Cr–O and Cr–N–O films serving as Cu oxidation resistant layers and their N_2 pre-sintering effect, 146
Modification of the Preston equation for the chemical–mechanical polishing of copper, 160
Growth rate and microstructure of copper thin films deposited with metal-organic chemical vapor deposition from hexafluoroacetylacetonate copper(I) allyltrimethylsilane, 229
Copper–aluminium alloys
Capacitance–voltage, current–voltage, and thermal stability of copper alloyed with aluminium or magnesium, 49
Copper–magnesium alloys
Capacitance–voltage, current–voltage, and thermal stability of copper alloyed with aluminium or magnesium, 49
Crystallization
Polycrystalline silicon thin films grown by dc arc discharge ion plating, 127
Effects of high-temperature annealing on the structure of reactive sputtering a-SiC:H films, 249
3C-SiC
Epitaxial growth of 3C-SiC by low-pressure chemical vapor deposition on a surface-structure-controlled molecular beam epitaxy layer, 32

Defects
Model and computer simulation results of defect transformation and decomposition of SiN_x:H films during high temperature treatment, 19
Deposition process
Reactive pulsed laser deposition of iridium oxide thin films, 6
Accurate control of thin film CdS growth process by adjusting the chemical bath deposition parameters, 37
Fluence dependence of hydroxyapatite laser ablation plumes, 43
Significance of substrate temperature on the properties of flash evaporated $CuIn_{0.75}Ga_{0.25}Se_2$ thin films, 54
Sputter deposition of high resistivity boron carbide, 174
A new formula on the thickness of films deposited by planar and cylindrical magnetron sputtering, 279
Dielectrics
Effect of pyrolysis temperature on the characteristics of PZT films deposited by the sol-gel method, 220
Diffusion
Model and computer simulation results of defect transformation and decomposition of SiN_x:H films during high temperature treatment, 19
Dimethyltetrathiafulvalene
Evaporated thin films of tetrathiafulvalene derivatives and their charge-transfer complexes, 209

Electrical characteristics
Effect of white light irradiation on the systems Al/poly(4,4-dipentoxy-2,2′-bithiophene)/ITO and Al/SiO/poly(4,4′-dipentoxy-2,2′-bithiophene)/ITO, 192
Electrical properties
Capacitance–voltage, current–voltage, and thermal stability of copper alloyed with aluminium or magnesium, 49
Nanocrystalline gold in Au-doped thin C_{60} films, 258
Conditioning effects on RTP (Pb,Ca)TiO_3 thin films, 292
Electrical properties and measurements
Accurate control of thin film CdS growth process by adjusting the chemical bath deposition parameters, 37
Electrochemistry
A study of electrochemical copolymerization of 3-butylthiophene and 3-bromothiophene, 106
A study of electrochemical copolymerization of 3-butylthiophene and 3-bromothiophene, 112
Electrochemistry of polyaniline Langmuir–Blodgett films, 203
Electrochromic devices
Preparation of transparent CeO_2–TiO_2 coatings for electrochromic devices, 245
Electrode
The role of as-grown defects and electrode materials on polarization orientation of $Pb(Zr_{0.52}Ti_{0.48})O_3$ on $YBa_2Cu_3O_{7-x}$, 225
Ellipsometry
Spectroscopic ellipsometry on silicon-oxide films on silicon, 253
Epitaxy
Characterization of epitaxially grown Cu/Nb multilayer on α-Al_2O_3 with RBS/channeling technique, 85
Evaporation
Significance of substrate temperature on the properties of flash evaporated $CuIn_{0.75}Ga_{0.25}Se_2$ thin films, 54

Ferroelectric properties
Effect of pyrolysis temperature on the characteristics of PZT films deposited by the sol-gel method, 220
Conditioning effects on RTP (Pb,Ca)TiO_3 thin films, 292
First order Raman
Raman scattering and high resolution electron microscopy studies of metal-organic chemical vapor deposition-tungsten disulfide thin films, 97

Hardness
The coated surface hardness: a kinematic model, 153
Effect of curing temperature on the mechanical properties of hydrogen silsesquioxane thin films, 186
Heat treatment
Heat treatment in high pressure H_2O vapor used for improvement of Si&z.sbnd;O bonding network near SiO_2/Si interface, 138
Heteroepitaxial growth
Epitaxial growth of 3C-SiC by low-pressure chemical vapor deposition on a surface-structure-controlled molecular beam epitaxy layer, 32
(hfac)Cu(ATMS)
Growth rate and microstructure of copper thin films deposited with metal-organic chemical vapor deposition from hexafluoroacetylacetonate copper(I) allyltrimethylsilane, 229
High resolution electron microscopy
Raman scattering and high resolution electron microscopy studies of metal-organic chemical vapor deposition-tungsten disulfide thin films, 97
Hydrogen
Growth and characterization of diamond-like carbon films by pulsed laser deposition and hydrogen beam treatment, 27

Polycrystalline silicon thin films grown by dc arc discharge ion plating, 127
Hydrogen annealing
Composition dependence of surface morphology of ultrathin a-SiGe:H alloys studying by atomic force microscopy, 130
Hydrogen silisesquioxane (HSQ)
Effect of curing temperature on the mechanical properties of hydrogen silsesquioxane thin films, 186

Impedance
Coupled second-harmonic generation, surface plasmon resonance and AC impedance studies of full and partial monolayers in (Au,Ag)-alkanethiolate electrolyte systems, 178
In situ doped
Second-oxidation properties of thin polysilicon films grown by LPCVD and heavily in situ boron-doped, 70
Indentation
The coated surface hardness: a kinematic model, 153
Indium arsenide
Preparation and optical properties of a SiO_2 film containing $In_{0.2}Ga_{0.8}As$ nanocrystals by radio-frequency magnetron co-sputtering, 64
Indium tin oxide
Room-temperature deposition of indium tin oxide thin films with plasma ion-assisted evaporation, 1
Pulsed laser deposited crystalline ultrathin indium tin oxide films and their conduction mechanisms, 299
Infrared spectroscopy
A study of electrochemical copolymerization of 3-butylthiophene and 3-bromothiophene, 106
A study of electrochemical copolymerization of 3-butylthiophene and 3-bromothiophene, 112
Integrated circuits
Capacitance–voltage, current–voltage, and thermal stability of copper alloyed with aluminium or magnesium, 49
Interfaces
Ion irradiation effect on single-crystalline Cu/Nb and Nb/Cu/Nb layers on sapphire, 134
Heat treatment in high pressure H_2O vapor used for improvement of Si&z.sbnd;O bonding network near SiO_2/Si interface, 138
Interface state density
Extraction of interface state density of Pt/p-strained-Si Schottky diode, 142
Interlayer dielectric
Effect of curing temperature on the mechanical properties of hydrogen silsesquioxane thin films, 186
Ion bombardment
Ion irradiation effect on single-crystalline Cu/Nb and Nb/Cu/Nb layers on sapphire, 134
Antibacterial effects of Ag-HAp thin films on alumina substrates, 214
Ion plating
Polycrystalline silicon thin films grown by dc arc discharge ion plating, 127
Ion-assisted deposition
Room-temperature deposition of indium tin oxide thin films with plasma ion-assisted evaporation, 1
Iridium
Reactive pulsed laser deposition of iridium oxide thin films, 6
l/poly(3-butylthiophene)/ITO
Effect of white light irradiation on the systems ITO/poly(4,4′-dipentoxy-2,2′bithiophene)/aluminium and ITO/poly(3-butylthiophene)/aluminium, 168

Langmuir–Blodgett films
Deposition and characterisation of Langmuir–Blodgett films of an azo-modified polypeptide:azobenzene-containing poly-L-lysine, 197
Laser ablation
Reactive pulsed laser deposition of iridium oxide thin films, 6
Growth and characterization of diamond-like carbon films by pulsed laser deposition and hydrogen beam treatment, 27
Fluence dependence of hydroxyapatite laser ablation plumes, 43
Pulsed laser deposited crystalline ultrathin indium tin oxide films and their conduction mechanisms, 299
Laser irradiation
Potential of Sb_2Se_3 films for photo-thermal phase change optical storage, 270
Lattice image
Raman scattering and high resolution electron microscopy studies of metal-organic chemical vapor deposition-tungsten disulfide thin films, 97
LB films
Electrochemistry of polyaniline Langmuir–Blodgett films, 203
$LiNbO_3$
Effect of substrate heating on elimination of pinholes in sputtering deposited SiO_2 films on $LiNbO_3$ single crystal substrates, 117
LPCVD-Si layers
Second-oxidation properties of thin polysilicon films grown by LPCVD and heavily in situ boron-doped, 70
Luminescence
Excitation energy dependence of photoluminescence in nanocrystalline silicon deposited by remote plasma chemical vapor deposition, 266

Measurements
Conditioning effects on RTP $(Pb,Ca)TiO_3$ thin films, 292
Metallization
Growth rate and microstructure of copper thin films deposited with metal-organic chemical vapor deposition from hexafluoroacetylacetonate copper(I) allyltrimethylsilane, 229
Metal-organic chemical vapor deposition
Raman scattering and high resolution electron microscopy studies of metal-organic chemical vapor deposition-tungsten disulfide thin films, 97
Growth rate and microstructure of copper thin films deposited with metal-organic chemical vapor deposition from hexafluoroacetylacetonate copper(I) allyltrimethylsilane, 229

Micro-rotating-structures
Measurements of residual stresses in thin films using micro-rotating-structures, 90
Modelling
The coated surface hardness: a kinematic model, 153
Modulus
Effect of curing temperature on the mechanical properties of hydrogen silsesquioxane thin films, 186
Molecular beam epitaxy
Epitaxial growth of 3C-SiC by low-pressure chemical vapor deposition on a surface-structure-controlled molecular beam epitaxy layer, 32
Molecular electronics
Electrochemistry of polyaniline Langmuir–Blodgett films, 203
Monolayers
The coated surface hardness: a kinematic model, 153
Evaluation of amine-functionalized coatings for liquid-phase QCM applications, 237
Multilayer
Characterization of epitaxially grown Cu/Nb multilayer on α-Al_2O_3 with RBS/channeling technique, 85
Multilayer
Studies with Ni/Ti multilayer films using X-ray photoelectron spectroscopy and neutron reflectometry: microscopic characterization of structure and chemical composition, 13

Nanoindentation
Effect of curing temperature on the mechanical properties of hydrogen silsesquioxane thin films, 186
Nanostructures
Preparation and optical properties of a SiO_2 film containing $In_{0.2}Ga_{0.8}As$ nanocrystals by radio-frequency magnetron co-sputtering, 64
Nanocrystalline gold in Au-doped thin C_{60} films, 258
Neutron reflectometry (NR)
Studies with Ni/Ti multilayer films using X-ray photoelectron spectroscopy and neutron reflectometry: microscopic characterization of structure and chemical composition, 13
Niobium
Characterization of epitaxially grown Cu/Nb multilayer on α-Al_2O_3 with RBS/channeling technique, 85
Niobium
Ion irradiation effect on single-crystalline Cu/Nb and Nb/Cu/Nb layers on sapphire, 134

Optical properties
Accurate control of thin film CdS growth process by adjusting the chemical bath deposition parameters, 37
Preparation and optical properties of a SiO_2 film containing $In_{0.2}Ga_{0.8}As$ nanocrystals by radio-frequency magnetron co-sputtering, 64
Synthesis of silicon carbide thin films by ion beam sputtering, 80
Excitation energy dependence of photoluminescence in nanocrystalline silicon deposited by remote plasma chemical vapor deposition, 266
Potential of Sb_2Se_3 films for photo-thermal phase change optical storage, 270
Optical spectroscopy
Fluence dependence of hydroxyapatite laser ablation plumes, 43
Optoelectronic devices
Effect of substrate heating on elimination of pinholes in sputtering deposited SiO_2 films on $LiNbO_3$ single crystal substrates, 117
Oxidation
Formation of Cr&z.sbnd;O and Cr&z.sbnd;N&z.sbnd;O films serving as Cu oxidation resistant layers and their N_2 pre-sintering effect, 146
Oxides
Reactive pulsed laser deposition of iridium oxide thin films, 6
Effect of substrate heating on elimination of pinholes in sputtering deposited SiO_2 films on $LiNbO_3$ single crystal substrates, 117

Photoelectric property
Composition dependence of surface morphology of ultra-thin a-SiGe:H alloys studying by atomic force microscopy, 130
Photovoltaic parameters
Effect of white light irradiation on the systems Al/poly(4,4-dipentoxy-2,2′-bithiophene)/ITO and Al/SiO/poly(4,4′-dipentoxy-2,2′-bithiophene)/ITO, 192
Physical vapor deposition
Modeling of reactively sputtered TiAlN films, 122
Polarization
The role of as-grown defects and electrode materials on polarization orientation of $Pb(Zr_{0.52}Ti_{0.48})O_3$ on $YBa_2Cu_3O_{7-x}$, 225
Poly(ethyleneimine)
Evaluation of amine-functionalized coatings for liquid-phase QCM applications, 237
Polyaniline
Electrochemistry of polyaniline Langmuir–Blodgett films, 203
Polymers
Deposition and characterisation of Langmuir–Blodgett films of an azo-modified polypeptide:azobenzene-containing poly-L-lysine, 197
Preferred orientation
Raman scattering and high resolution electron microscopy studies of metal-organic chemical vapor deposition-tungsten disulfide thin films, 97
Preston equation
Modification of the Preston equation for the chemical–mechanical polishing of copper, 160
Proton elastic scattering
Formation of titanium nitride films by energetic cluster impact deposition, 59
PZT
The role of as-grown defects and electrode materials on polarization orientation of $Pb(Zr_{0.52}Ti_{0.48})O_3$ on $YBa_2Cu_3O_{7-x}$, 225

Quartz-crystal microbalance
Evaluation of amine-functionalized coatings for liquid-phase QCM applications, 237

Raman scattering
Raman scattering and high resolution electron microscopy studies of metal-organic chemical vapor deposition-tungsten disulfide thin films, 97
RBS-channeling technique
Ion irradiation effect on single-crystalline Cu/Nb and Nb/Cu/Nb layers on sapphire, 134
Reaction kinetics
A study of electrochemical copolymerization of 3-butylthiophene and 3-bromothiophene, 106
A study of electrochemical copolymerization of 3-butylthiophene and 3-bromothiophene, 112
Residual stresses
Measurements of residual stresses in thin films using micro-rotating-structures, 90
Resistivity
Growth and characterization of diamond-like carbon films by pulsed laser deposition and hydrogen beam treatment, 27
Rutherford backscattering spectrometry
Formation of titanium nitride films by energetic cluster impact deposition, 59
Characterization of epitaxially grown Cu/Nb multilayer on α-Al_2O_3 with RBS/channeling technique, 85

Schottky diodes
Extraction of interface state density of Pt/p-strained-Si Schottky diode, 142
Effect of white light irradiation on the systems ITO/poly(4,4′-dipentoxy-2,2′bithiophene)/aluminium and ITO/poly(3-butylthiophene)/aluminium, 168
Second harmonic generation
Coupled second-harmonic generation, surface plasmon resonance and AC impedance studies of full and partial monolayers in (Au,Ag)-alkanethiolate electrolyte systems, 178
Second order Raman
Raman scattering and high resolution electron microscopy studies of metal-organic chemical vapor deposition-tungsten disulfide thin films, 97
Second-oxidation
Second-oxidation properties of thin polysilicon films grown by LPCVD and heavily in situ boron-doped, 70
Selenides
Potential of Sb_2Se_3 films for photo-thermal phase change optical storage, 270
Self-assembled monolayers
Coupled second-harmonic generation, surface plasmon resonance and AC impedance studies of full and partial monolayers in (Au,Ag)-alkanethiolate electrolyte systems, 178
SiGe alloys
Composition dependence of surface morphology of ultra-thin a-SiGe:H alloys studying by atomic force microscopy, 130
Silicon
Polycrystalline silicon thin films grown by dc arc discharge ion plating, 127
Spectroscopic ellipsometry on silicon-oxide films on silicon, 253
Excitation energy dependence of photoluminescence in nanocrystalline silicon deposited by remote plasma chemical vapor deposition, 266
Silicon carbide
Synthesis of silicon carbide thin films by ion beam sputtering, 80
Silicon nitride
Model and computer simulation results of defect transformation and decomposition of SiN_x:H films during high temperature treatment, 19
Silicon oxide
Heat treatment in high pressure H_2O vapor used for improvement of Si&z.sbnd;O bonding network near SiO_2/Si interface, 138
Spectroscopic ellipsometry on silicon-oxide films on silicon, 253
Silver
Antibacterial effects of Ag-HAp thin films on alumina substrates, 214
SiO_2
Effect of substrate heating on elimination of pinholes in sputtering deposited SiO_2 films on $LiNbO_3$ single crystal substrates, 117
Solar cells
Significance of substrate temperature on the properties of flash evaporated $CuIn_{0.75}Ga_{0.25}Se_2$ thin films, 54
Sonocatalytic sol-gel method
Preparation of transparent CeO_2–TiO_2 coatings for electrochromic devices, 245
Sputtering
Preparation and optical properties of a SiO_2 film containing $In_{0.2}Ga_{0.8}As$ nanocrystals by radio-frequency magnetron co-sputtering, 64
Sputter deposition of high resistivity boron carbide, 174
A new formula on the thickness of films deposited by planar and cylindrical magnetron sputtering, 279
Sputtering deposition
Effect of substrate heating on elimination of pinholes in sputtering deposited SiO_2 films on $LiNbO_3$ single crystal substrates, 117
Strained-Si
Extraction of interface state density of Pt/p-strained-Si Schottky diode, 142
Structural properties
Nanocrystalline gold in Au-doped thin C_{60} films, 258
Succinic anhydride
Evaluation of amine-functionalized coatings for liquid-phase QCM applications, 237
Surface morphology
Composition dependence of surface morphology of ultra-thin a-SiGe:H alloys studying by atomic force microscopy, 130
A new formula on the thickness of films deposited by planar and cylindrical magnetron sputtering, 279
Surface plasmons
Coupled second-harmonic generation, surface plasmon resonance and AC impedance studies of full and partial monolayers in (Au,Ag)-alkanethiolate electrolyte systems, 178
Surface potential

Extraction of interface state density of Pt/p-strained-Si Schottky diode, 142
Surface-structure-controlled epitaxy
Epitaxial growth of 3C-SiC by low-pressure chemical vapor deposition on a surface-structure-controlled molecular beam epitaxy layer, 32

Thermal evaporation
Evaporated thin films of tetrathiafulvalene derivatives and their charge-transfer complexes, 209
Thickness shear mode
Evaluation of amine-functionalized coatings for liquid-phase QCM applications, 237
Thin film
Effect of curing temperature on the mechanical properties of hydrogen silsesquioxane thin films, 186
Thin film characterisation
Evaporated thin films of tetrathiafulvalene derivatives and their charge-transfer complexes, 209
Titanium nitride
Formation of titanium nitride films by energetic cluster impact deposition, 59
Transparent coatings
Preparation of transparent CeO_2–TiO_2 coatings for electrochromic devices, 245
Transparent semiconductors
Room-temperature deposition of indium tin oxide thin films with plasma ion-assisted evaporation, 1
Trimethyltetrathiafulvalene
Evaporated thin films of tetrathiafulvalene derivatives and their charge-transfer complexes, 209
Tungsten disulfide
Raman scattering and high resolution electron microscopy studies of metal-organic chemical vapor deposition-tungsten disulfide thin films, 97

Water
Heat treatment in high pressure H_2O vapor used for improvement of Si&z.sbnd;O bonding network near SiO_2/Si interface, 138

White light irradiation
Effect of white light irradiation on the systems ITO/poly(4,4′-dipentoxy-2,2′bithiophene)/aluminium and ITO/poly(3-butylthiophene)/aluminium, 168
Effect of white light irradiation on the systems Al/poly(4,4-dipentoxy-2,2′-bithiophene)/ITO and Al/SiO/poly(4,4′-dipentoxy-2,2′-bithiophene)/ITO, 192

X-ray diffraction
Formation of titanium nitride films by energetic cluster impact deposition, 59
Synthesis of silicon carbide thin films by ion beam sputtering, 80
X-ray photoelectron spectroscopy
Studies with Ni/Ti multilayer films using X-ray photoelectron spectroscopy and neutron reflectometry: microscopic characterization of structure and chemical composition, 13
Synthesis of silicon carbide thin films by ion beam sputtering, 80
Formation of Cr&z.sbnd;O and Cr&z.sbnd;N&z.sbnd;O films serving as Cu oxidation resistant layers and their N_2 pre-sintering effect, 146

ZnS
Epitaxial growth of II–VI compound semiconductors by atomic layer epitaxy, 284
ZnSe
Epitaxial growth of II–VI compound semiconductors by atomic layer epitaxy, 284
ZnSe/ZnS strained-layer superlattice
Epitaxial growth of II–VI compound semiconductors by atomic layer epitaxy, 284
ZnS_xSe_{1-x}
Epitaxial growth of II–VI compound semiconductors by atomic layer epitaxy, 284
